The 2 way full range TPA122/95-WH is a switchable passive/bi-amp 12" 2,000 Watt arrayable loudspeaker system that is ideally suited for a wide range of speech and music sound reinforcement applications. The TPA122/95-WH is designed to work in conjunction with **TURBOSOUND** loudspeaker management systems, providing optimal FOH performance, as well as offering considerable flexibility to readily adapt to varying venue requirements.

The TPA122/95-WH arrayable loudspeaker features a carbon fibre loaded 12" low frequency driver with inside/outside wound coil with low mass voice coil for improved transient response, and an aluminium dome 1" neodymium motor compression driver mounted on a rotatable 90° horizontal by 50° vertical waveguide. All drivers are matched with an internal passive crossover network in a reflex-loaded enclosure, and bi-amp mode can be enabled by means of a rear panel switch.

Finished in a highly durable semi matt white paint, the cabinet is constructed from 15 mm (5/8") birch plywood – and includes a rugged powder coated perforated steel mesh grille backed with reticulated foam. Internal M10 threaded rigging points are provided for suspension in any orientation, or mounting with dedicated brackets – available separately. The rear panel connector plate carries Neutrik speakON\* NL4 and barrier strip connectors for input and link connections to additional enclosures.

## Mounting and Rigging

The cabinet is fitted with a quantity of 15 M10 internally-threaded rigging points on the top, bottom, sides and rear, that allow it to be rigged with M10 eyebolts and mounted in a variety of ways to suit differing applications.

An adjustable wall bracket (TPA122-WB) enables the cabinet to be fixed to a ceiling or wall, with the ability to rotate and adjust the angle to achieve optimum coverage. (In addition, the horn may be rotated through 90 degrees to vary the dispersion if desired.)
