PRODUCT OVERVIEW

INTRODUCTION

TASCAM's CD-200BT matches a high-quality CD player with Bluetooth technology, to play audio from nearly any current laptop, smartphone, or tablet.

The CD player uses the TEAC CD-5020A transport, custom-designed for audio playback with a smooth loading drawer and low clamping noise. The high-quality internal clock provides smooth sound and low jitter.

The Bluetooth receiver supports single-touch pairing with up to eight devices. It uses the aptX, AAC, and SBC codecs for the best audio quality possible. A quick press of the pairing button switches between paired devices, and the currently-selected device scrolls in the display. An analog Aux input is also provided for direct connection.

TASCAM's CD-200BT has unbalanced phono outputs and S/PDIF digital out on coaxial and optical jacks. MP3 and WAV file playback is supported from CD media. A wireless remote control with numerical track select buttons is also included.
